

GINGERLEAD

1. Pass sling under pet's belly holding straps on each side of pet. Handle should always be on the left side of your pet.

2. Hold handle with attached leash on top and lining facing down. Bring free strap under handle and align beneath Velcro.

3. Wrap handle under and around the loose strap and close the Velcro ends of the handle together so that the loose strap is inside the handle and the leash is on top.

4. Attach leash to your pet's collar with the snap hook and you're ready to go!
